

# NORMALIZATION :

Thursday, April 23, 2020 10:40 AM

## What is Normalization ?

**" It is the process of reducing a large table into smaller tables in order to remove redundancies and anomalies by identifying their functional dependencies is known as Normalization . "**

Or

**"The process of decomposing a large table into smaller table is known as Normalization ."**

Or

**"Reducing a table to its Normal Form is known as Normalization . "**

What is **Normal Form** ?

*A table without redundancies and anomalies are said to be in Normal Form .*

### Types of Normal From .

1. **First Normal Form ( 1NF )**
2. **Second Normal Form ( 2NF )**
3. **Third Normal Form ( 3NF )**
4. **Boyce - Codd Normal Form ( BCNF )**

**Note : If any Table / entity is reduced to 3NF , then the table is said to be normalized.**

1. **First Normal Form ( 1NF )**:

- No duplicates records .
- Multivalued data should not be present .

QSPIDERS

<u>QID</u>	<u>NAME</u>	<u>COURSE</u>
1	A	JAVA
2	B	JAVA , SQL
3	C	MT , SQL
1	A	MT

<u>QID</u>	<u>NAME</u>	<u>C1</u>	<u>C2</u>	<u>C3</u>
1	A	JAVA		MT
2	B	JAVA	SQL	
3	C		SQL	MT

2. **Second Normal Form ( 2NF )**

- Table should be in 1NF
- Table should not have Partial Functional Dependency .

**EMPLOYEE** - ( EID , ENAME , SAL , DEPTNO , DNAME , LOC )

<u>EID</u>	<u>ENAME</u>	<u>SAL</u>	<u>DEPTNO</u>	<u>DNAME</u>	<u>LOC</u>
1	A	100	10	D1	L1
2	B	120	20	D2	L2
3	C	320	10	D1	L1
4	D	251	10	D1	L1

**Eid** - ename ,sal

**Deptno** - dname , loc

$\therefore ( \text{Eid} / \text{deptno} ) \rightarrow ( \text{Ename} , \text{Sal} , \text{Dname} , \text{Loc} )$   
composite key attribute  $\longrightarrow$  results in PFD

R1 - ( **EID** , ENAME , SAL )

R2 - ( **DEPTNO** , DNAME , LOC )

**R1**

<u>Eid</u>	<u>Ename</u>	<u>Sal</u>
1	A	100
2	B	120
3	C	320

**R2**

<u>Deptno</u>	<u>dname</u>	<u>Loc</u>
10	D1	L1
20	D2	L2

### 3. Third Normal Form (3NF)

- Table should be in 2NF .
- Table should not have Transitive Functional Dependency .

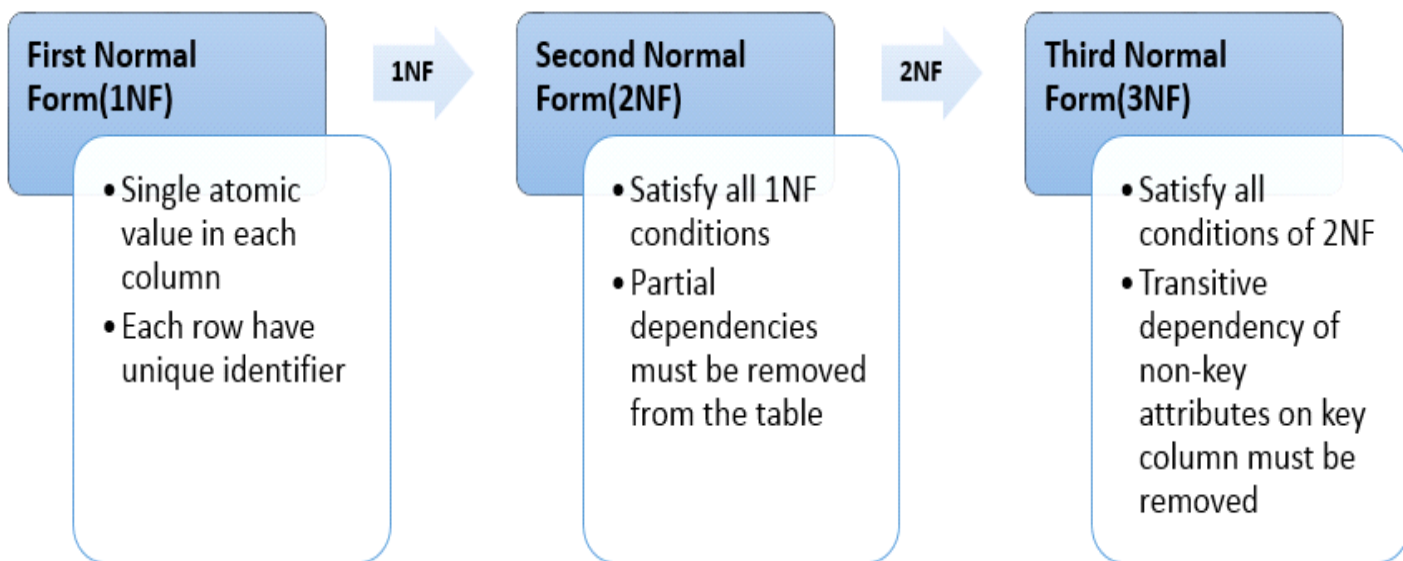

**Employee - ( **EID** , Ename , Sal , comm , Pincode , state , country )**

:- Transitive Functional Dep

R1- ( **EID** , ename , comm )

R2- ( **PINCODE** , state , country )
